

Bill South

Karl Hemmerich

TechTeam™

We're Here to Help

We proudly congratulate two of our TechTeam™ members on their MDDI 100 Notable People recognition.

We're also proud to introduce TechTeam, the new name for STERIS Isomedix's technical support group.

If you have a specialty product, we'll develop a specialty solution. Whether you're revalidating an existing sterilization process, developing a new product validation, need to know more about the best materials to specify in your medical device, or just want to discuss your technical options, ***we're here to help.***

With experts like Bill South and Karl Hemmerich, and with the extensive resources of STERIS Corporation, we have a team second to none – ready to meet any need in radiation, EtO validation, or anywhere within your sterilization process. We have information and knowledge on just about anything to do with sterilization – just a phone call away.

Why “Team”? It's our core approach and philosophy. That's why it's part of our name. We continually work to be known as a vital and complementary part of our client's sterilization group, providing insightful alternatives, choices, and solutions. We view your product sterilization needs not as a one-time event, but as an ongoing relationship – one that we respect.

From dose audit reminders to FDA updates, we strive to support your compliance efforts. When it comes to product qualification, same day processing, personal consultation, or just a helpful seminar, we're here for you. We pride ourselves on being an objective resource for you, wherever your sterilization fulfillment occurs.

Need to add resources to your lineup? We're here to help. Call 877.783.7479 or log onto www.isomedix.com.
